Summary

Results-driven Full Stack Developer with **3+ years of professional experience** building scalable, secure, and high-performance web applications. Specialized in **Laravel (PHP)** for backend development and **Vue.js, Next.js, and Tailwind CSS** for creating modern, responsive, and user-friendly frontend interfaces. Passionate about writing clean, maintainable code while following industry best practices to deliver reliable and efficient software solutions.

Experienced in developing **RESTful APIs**, integrating third-party services such as **Stripe, Twilio, Firebase, and Google APIs**, and managing relational databases using **MySQL** and **Eloquent ORM**. Proficient in implementing **JWT authentication, role-based access control (RBAC)**, and subscription billing with **Laravel Cashier**. Adept at optimizing application performance, improving user experience, and collaborating effectively within Agile development teams to deliver high-quality products.

Skills

Laravel (PHP), Vue.js, Next.js, RESTful API Development, Payment Gateway Integration (Stripe), Third-Party API Integration (Stannp, CH, Twilio, Firebase), Tailwind CSS, MVC Architecture, Git & GitHub, Agile/Scrum Methodologies, JWT Authentication, SQL & MySQL

Experience

Orix Tech | Lahore

Full Stack Developer | 05/2025 - Present

As a **Full Stack Developer**, I design and develop scalable web applications using Laravel, focusing on clean architecture and efficient backend logic. I create responsive and interactive user interfaces with Vue.js, Next.js, and Tailwind CSS. My work includes building and consuming secure RESTful APIs for smooth client-server communication. I integrate third-party services like Stripe for payments. I collaborate with cross-functional teams and maintain high code quality using Git. My focus is on delivering seamless, user-centric solutions across the full development stack.

ML Bench | Lahore, Pakistan

Laravel Developer | Full Stack Developer | 10/2023 - 05/2025

As a **Laravel developer**, I built and maintained scalable full-stack web applications and was honored twice as **Employee of the Month** for my contributions. I developed secure **RESTful APIs** and integrated services like Stripe for payments, Twilio for SMS, and Firebase for real-time features. I implemented chat functionality and push notifications using Firebase. On the backend, I used Eloquent ORM and optimized database queries for performance. For frontend development, I worked with Next.js, Tailwind CSS to create responsive UIs. I also explored React.js to strengthen my **full-stack development** skills.

TNT Sol | Lahore, Pakistan

PHP Laravel Internship | 06/2023 - 10/2023

As a **PHP Laravel intern**, I developed RESTful APIs and implemented business logic using Laravel's MVC structure. I also gained hands-on experience with Git for version control, caching strategies to enhance performance, and unit testing to ensure code reliability. Additionally, I collaborated with senior developers and followed best coding practices to contribute effectively to real-world projects.

Education

Virtual University of Pakistan | Lahore, Pakistan

BSCS | 08/2024

Projects

Health & Wellness

Fitme Diet Planner Built a secure Laravel backend with RESTful APIs for a cross-platform meal planning app. Integrated Firebase Push Notifications for real-time engagement and delivered a responsive UI with Bootstrap, ensuring reliable performance through thorough testing.

Sokar App Developed a health management platform using Laravel, enabling vital tracking, medication reminders, and family health sharing. Integrated AidexAPI for advanced health insights, backed by a structured MySQL database for reliable data management. (<https://sokar.vercel.app/>)

Real Estate & Property Management

EloTenant Built a full stack Laravel SaaS for sober living property management with a dual admin and tenant portal. Key features include digital lease e-signing, Stripe rent payments with auto-pay, drug screening with randomization, GPS geo-fencing and donor tenant management all across a secure multi domain architecture.

Business Productivity & SaaS

Productively Delivered a Laravel SaaS platform for UK small businesses covering task and project management, team collaboration, Google and Outlook Calendar sync, HoxtonMix virtual mailbox, UK Companies House integration, AI compliance suggestions, Stripe subscriptions, and a dynamic letter campaign system with geo detection for region specific experiences.

Islamic & Community

My Mufti App Developed a secure Laravel backend for an Islamic Q&A platform connecting users with qualified Muftis. Implemented optimized fatwa search, question response management, and community features with a well indexed MySQL database for fast performance. (<https://mymuftiapp.com/>)

Payments & Business Listings

PaySano App Built a multi role Laravel backend supporting business listings, product ordering, and in-app chat. Integrated Stripe subscriptions, Google Maps for location based discovery, and role-based access control for secure customer, business, and admin experiences. (<https://paysano.it/>)

Communication & Surveys

SMS Survey Built a Laravel and Twilio powered SMS survey platform with customizable surveys, real time response tracking, bulk contact import, and webhook based live updates secured with thorough input validation and testing (<https://poll.mycampaignkit.com/>)

Tools & Utilities

MPG OCR Developed a full stack document processing tool using Next.js, MongoDB, and Tailwind CSS. Integrated an OCR API for data extraction and synced results with an Oracle based TMS across multiple databases for accurate, seamless data management. (<https://mpgocr.vercel.app/>)
